

10 Years in Business

March 2008

AltaLIS is pleased to announce that we are celebrating our 10th Anniversary this year.

Since partnering with Spatial Data Warehouse and opening our doors for business on April 1, 1998, we are proud of our growth and accomplishments. We are currently delivering well over 5,000 data requests per year to more than 1,000 user organizations.

AltaLIS has developed and refined delivery mechanisms, including the Virtual Order Desk on the AltaLIS website, which now processes 77% of data deliveries on demand, directly through the internet to the user's desktop.

Near Real Time updating has been implemented for cadastral and title mapping making new plans of survey integrated into the mapping available to users within 24 hours.

Title Mapping, Base Features and Disposition Mapping are all new datasets which have been introduced during the past decade to add to the base mapping fabric of Alberta.

All product pricing has been drastically reduced from the 1998 price list, most of it by half.

We are proud that AltaLIS has become an integral part of the geomatics industry in Alberta and look forward to maintaining and providing base mapping data for the benefit of all Albertans for years to come.

If you would like to contact us, you may do so by e-mail at info@altalis.com or by phone at (403)716-3490.
