

Dispositions in Special Areas added to DIDs!

January 2010

AltaLIS is pleased to announce that key disposition types within the Special Areas in eastern Alberta have been added to the provincial Disposition Mapping Dataset.

Dispositions within Special Areas (Special Area 2, 3 & 4) were not originally part of the DIDs mapping initiative. An agreement with the Special Areas board was reached for the release of well site and access road dispositions for integration into the Provincial DIDs mapping. These dispositions have now been integrated and are available to industry.

The Digital Integrated Dispositions (DIDs) mapping product was created through a partnership between the Alberta Government's (GOA's) Public Lands Division and Spatial Data Warehouse (SDW) and is available through their distribution agency, AltaLIS Ltd.

DIDs mapping is available in 250K blocks or a seamless provincial coverage in GIS and CAD formats, by transaction or subscription, through the AltaLIS Virtual Order Desk.

The access subscription price is \$2000 per year, which includes unlimited downloads from our Virtual Order Desk. Municipalities or other 'defined' service areas are available for \$200 per year. Transactional access fees are \$100 for the first 250K file plus \$25 for each additional file, to a maximum of \$500 (within the same transaction).

For a detailed description and sample of DIDs, visit our webpage:
