

## AltaLIS Price Reductions for 2007

January 2007

AltaLIS has added more FREE products, lowered the price of contours, and cut the 'buy in' price for Property subscriptions in half.

The **1:250 Topographic Base** is now FREE. With an accuracy of +/- 100 meters, this provincial coverage of Small Scale mapping will provide surface topography for an accurate frame of reference.

**Settlements** are the latest addition to the FREE Alberta Boundary layers, bringing the total to sixteen. AltaLIS will continue to update and make more boundaries available as they are released.

Individual **1:20000 Contour** layers have been reduced from \$40 to \$25 per mapsheet for Base Features, and from \$50 to \$25 for Historic.

The '**buy-in**' price for **Rural Cadastral and Title update subscriptions** has been cut in half. AltaLIS is encouraging users to subscribe to large areas to access current Cadastral and Title updates. The purchase price for Cadastral or Title townships are now \$50 each and the Bundle price is \$75 when a 5 year update subscription is signed. Updates are \$18 per township, which includes unlimited access through the Virtual Order Desk.
