

AltaLIS Announces a NEW product: DIDs+

October 2012

Digital Integrated Dispositions (DIDs) is an accurate and complete geospatial mapping product that maintains surface activity extents on Crown Land in Alberta and is used for regulatory, permitting and planning applications, by all industry, public and private sector interests that are active on public lands.

DIDs mapping is updated daily, and is available from the AltaLIS Virtual Order Desk (VOD) as a subscription service or by 250K NTS tiles ordered one at a time.

Enhanced DIDs+ attributes will save you time and money!

DIDs

DIDs: For **\$2400** per year, a provincial subscription of DIDs includes unlimited access to current mapping extents of over 35 surface disposition types on Crown Land in a shape file format. Examples include: LOC, MSL, EZE, PLA, GRP, etc.

DIDs+

DIDs+: For **\$6300** per year, a provincial subscription of DIDs+ includes everything in DIDs, PLUS over 40 attributes integrated into the shape file daily. Examples include: Client (owner) name & Client address.

AltaLIS Property Products

With DIDs mapping covering public land and Cadastral & Title covering private land, Alberta has comprehensive, accurate, accessible and affordable multi-layered base mapping datasets available to all who are active on our landscape! For more information email: info@AltaLIS.com, or call the AltaLIS Order Desk at 403-716-3490.
